

SINGLE IBC BUND

COMPLETE WITH REMOVABLE GRID

Safe storage solution for acids and alkalis

Premium UK made steel

This premium quality Steel IBC Bund is specifically designed to carry a standard 1000 litre IBC and holds 110% of the contents of the container. It is manufactured from 2.5mm mild steel and fully seam welded in order to ensure a leak proof sump. The sturdy skids are suitable for both pallet truck and forklift truck conveyance. The strong galvanised grid is fully removable.

Available in different colour options, this one comes in RAL5010 (Gentian Blue) - a high quality anti-corrosion solvent based 2 pack polyurethane coating.

- British design & manufacture
- Suitable for industrial, agricultural and commercial use
- High impact strength
- Bund contains minimum 110% volume of the stored liquid
- Hot dip galvanised spill grid
- Forklift pockets for transport
- 2 year warranty against manufacturing defects

Bund dimensions (mm)

Height	Length	Width	Capacity	Grid
930	1255	1255	1100 Litres	Galvanised (removable)
